# Sample Presentation

Youri Ackx

August 2019

### A first slide

This is a slide. Only text.

## List

- · Item 1
- · Item 2
- · Item 3

### Equation

You can use the usual LateX format.

$$\forall x \in X, \quad \exists y \le \epsilon$$

## Text formatting

- · This is italic
- · This is bold
- · strikethrough

Figure 1: This is a free image of a ladybug

### Multiple levels

#### Level 1

- · Some things
- · Take place here

#### Level 2

Stranger things

```
Some code:
public static void main(String [] args) {
    System.out.println("Hello, World!");
}
```

Standard markdown syntax.

Α	В	С
1	YES	NO
2	YES	YES

Column 1	Column 2
I want the contents of this cell to fit into one line	Word1
	Word2

https://pandoc.org/MANUAL.html#tables

Table 3: Here's the caption. It, too, may span multiple lines.

Centered	Default		
Header	Aligned	Right Aligned	Left Aligned
First	row	12.0	Example of a row that
			spans multiple lines.
Second	row	5.0	Here's another one.
			Note the blank line
			between rows.

These work like simple tables, but with the following differences:

- They must begin with a row of dashes, before the header text (unless the headers are omitted).
- They must end with a row of dashes, then a blank line.
- The rows must be separated by blank lines.

## Table with alignment

Table 4: Demonstration of simple table syntax.

Right	Left	Center	Default
12	12	12	12
123	123	123	123
1	1	1	1

### Table with pipe alignment

Alignments can be specified as with pipe tables, by putting colons at the boundaries of the separator line after the header.

Right	Left	Centered
Bananas	\$1.34	built-in wrapper

### Table without header

12	12	12	12
123	123	123	123
1	1	1	1

## Grid table

Table 7: Sample grid table.

Fruit	Price	Advantages
Bananas	\$1.34	<ul><li>built-in wrapper</li><li>bright color</li></ul>
Oranges	\$2.10	<ul><li>cures scurvy</li><li>tasty</li></ul>

#### Grid table

#### How to

The row of =s separates the header from the table body, and can be omitted for a headerless table. The cells of grid tables may contain arbitrary block elements (multiple paragraphs, code blocks, lists, etc.). Cells that span multiple columns or rows are not supported.

#### Columns

Apple

Orange

Banana

Cherry

Brussels sprout

Eggplant

Cucumber
