Sample Presentation

Youri Ackx

August 2019

A first slide

This is a slide.

Slide with list

- Item 1
- Item 2
- Item 3

You can use the usual LateX format.

$$\forall x \in X, \quad \exists y \leq \epsilon$$

- *This is italic*
- This is bold
- ~~strikethrough~~

Level 1

- Some things
- Take place here

Level 2

- Stranger things

Code

Some code:

```java
public static void main(String [] args) {
    System.out.println("Hello, World!");
}
```

Standard markdown syntax.

A	B	C
1	YES	NO
2	YES	YES

Table 2: Column 2 is narrow. For column 1: 54 dashes in Markdown source for separator line; for column 2: 12 dashes in separator line (22% of column 1).

Column 1	Column 2
I want the contents of this cell to fit into one line	Word1 Word2

https://pandoc.org/MANUAL.html#tables

Table 3: Here's the caption. It, too, may span multiple lines.

Centered Header	Default Aligned	Right Aligned	Left Aligned
First	row	12.0	Example of a row that spans multiple lines.
Second	row	5.0	Here's another one. Note the blank line between rows.

These work like simple tables, but with the following differences:

· They must begin with a row of dashes, before the header text (unless the headers are omitted).

· They must end with a row of dashes, then a blank line.

Table 4: Demonstration of simple table syntax.

Right	Left	Center	Default
12	12	12	12
123	123	123	123
1	1	1	1

Alignments can be specified as with pipe tables, by putting colons at the boundaries of the separator line after the header.

Right	Left	Centered
Bananas	$1.34	built-in wrapper

12	12	12	12
123	123	123	123
1	1	1	1

Table 7: Sample grid table.

Fruit	Price	Advantages
Bananas	$1.34	· built-in wrapper · bright color
Oranges	$2.10	· cures scurvy · tasty

The row of =s separates the header from the table body, and can be omitted for a headerless table. The cells of grid tables may contain arbitrary block elements (multiple paragraphs, code blocks, lists, etc.). Cells that span

Apple	Brussels sprout
Orange	Eggplant
Banana	Cucumber
Cherry
